TAKE A CLOSER LOOK: RECURRENCE INCIDENCE MAY BE HIGHER THAN YOU THINK

For certain patients with
RCC after nephrectomy

An observational analysis using **SEER-Medicare data¹**
from 2007–2016, which included **643 patients**, revealed that...

of patients in this
observational
analysis with RCC
post nephrectomy
**EXPERIENCED
RECURRENCE¹**

Of those
patients who
experienced
recurrence,

**HAD
METASTATIC
DISEASE¹**

ANALYSIS POPULATION¹:

- T2, grade 4, N0, M0; T3, N0, M0; T4, N0, M0; or T any stage, N+, M0.
- Median follow-up duration of analysis was 23 months.

ANALYSIS LIMITATIONS¹:

- Recurrence was inferred from the database codes rather than directly determined based on clinical data.
- The analyzed SEER-Medicare data represent patients ≥ 65 years. Hence, the results from this analysis may not reflect outcomes among the younger patient population.
- Impacts of recurrence may be confounded by unmeasured characteristics. Caution must be used when considering causal inference from this analysis.

Discuss this risk of recurrence
with your appropriate patients
with RCC post nephrectomy.

M0 = no distant metastasis; N0 = no regional lymph node metastasis; N+ = regional lymph node metastasis; RCC = renal cell carcinoma; SEER = Surveillance, Epidemiology, and End Results; T = primary tumor; T2 = tumor >7 cm in greatest dimension, limited to the kidney; T3 = tumor extends into major veins or perinephric tissues, but not into the ipsilateral adrenal gland and not beyond Gerota's fascia; T4 = tumor invades beyond Gerota's fascia (including contiguous extension into the ipsilateral adrenal gland).

AUA DISCLOSURE POLICY

All persons in a position to control the content of an educational activity (i.e., activity planners, presenters, authors) are required to disclose to the provider all financial relationships with any commercial interest (aka ineligible company) during the previous 24 months. The AUA must determine if the individual's relationships may influence the educational content and mitigate any conflicts of interest prior to the commencement of the educational activity. The intent of this disclosure is not to prevent individuals with relevant financial relationships from participating, but rather to provide learners information with which they can make their own judgments.

Disclosures are posted online at www.auanet.org/AUA2023/speakers.

MITIGATION OF IDENTIFIED CONFLICT OF INTEREST

All disclosures will be reviewed by the AUA Conflict of Interest (COI) Review Work Group Chair and/or Vice Chair for identification of conflicts of interest. The AUA COI Review Work Group, working with Office of Education staff, will document the mechanism(s) for management and mitigation of the conflict of interest and final approval of the activity will be documented prior to implementation. Any of the mechanisms below can/will be used to mitigate conflict of interest:

- Peer review for valid, evidence-based content by the AUA COI Review Work Group
- Attestation that clinical recommendations are evidence-based and free of commercial bias
- Introduction of a debate format (point-counterpoint).
- Inclusion of moderated panel discussion with unbiased moderator
- Publication of a parallel or rebuttal article for an article that is felt to be biased
- Divestiture of the relationship by faculty
- Recusal from controlling relevant aspects of planning
- Selection of alternative faculty for specific topic
