

Acknowledgments and Disclaimers: AUA Guideline on the Management of Benign Prostatic Hyperplasia

This document was written by the Benign Prostatic Hyperplasia (BPH) Guideline Update Panel of the American Urological Association Education and Research, Inc. (AUA) which was created in 1996 . The committee chair(s) were selected by the Practice Guidelines Committee (PGC) of the AUA. Panel members were selected by the chairs. Membership of the committee included urologists, internists and family physicians. The mission of the committee was to develop recommendations, that are analysis-based or consensus-based, depending on panel processes and available data, for optimal clinical practices in the diagnosis and treatment of BPH. This document was submitted for peer review to 58 physicians and researchers from the disciplines of urology, surgery, and family practice. After the final revisions were made based upon the peer review process, the document was submitted to, and approved by the PGC and the Board of Directors of the AUA. Funding of the committee was provided by the AUA. Committee members received no remuneration for their work. Each member of the committee provided a conflict of interest disclosure to the AUA.

This report is intended to provide medical practitioners with a consensus of principles and strategies for the care of BPH. The report is based on current professional literature, clinical experience and expert opinion. It does not establish a fixed set of rules or define the legal standard of care and it does not pre-empt physician judgment in individual cases. Physician judgment must take into account variations in resources and in patient needs and preferences.
