Quality ID #48: Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 Years and Older – National Quality Strategy Domain: Effective Clinical Care

2018 OPTIONS FOR INDIVIDUAL MEASURES:
REGISTRY ONLY

MEASURE TYPE:
Process

DESCRIPTION:
Percentage of female patients aged 65 years and older who were assessed for the presence or absence of urinary incontinence within 12 months

INSTRUCTIONS:
This measure is to be submitted a minimum of once per performance period for patients seen during the performance period. This measure is appropriate for use in the ambulatory setting only and is considered a general screening measure. There is no diagnosis associated with this measure. This measure may be submitted by eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding.

Measure Submission:
The listed denominator criteria is used to identify the intended patient population. The numerator options included in this specification are used to submit the quality actions allowed by the measure. The quality-data codes listed do not need to be submitted for registry-based submissions; however, these codes may be submitted for those registries that utilize claims data.

DENOMINATOR:
All female patients aged 65 years and older with a visit during the measurement period

Denominator Criteria (Eligible Cases):
All female patients aged ≥ 65 years on date of encounter
AND
Patient encounter during the performance period (CPT or HCPCS): 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99324, 99325, 99326, 99327, 99328, 99334, 99335, 99336, 99337, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350, G0402
AND NOT
DENOMINATOR EXCLUSION:
Patient use of hospice services any time during the measurement period: G9693

NUMERATOR:
Patients who were assessed for the presence or absence of urinary incontinence within 12 months

Definition:
Urinary Incontinence – Any involuntary leakage of urine

Numerator Options:
Performance Met: Presence or absence of urinary incontinence assessed (1090F)
OR
Performance Not Met: Presence or absence of urinary incontinence not assessed, reason not otherwise specified (1090F with 8P)
RATIONALE:
Female patients may not volunteer information regarding incontinence so they should be asked by their physician.

CLINICAL RECOMMENDATION STATEMENTS:
Strategies to increase recognition and reporting of UI are required and especially the perception that it is an inevitable consequence of aging for which little or nothing can be done. (ICI)

Patients with urinary incontinence should undergo a basic evaluation that includes a history, physical examination, measurement of post-void residual volume, and urinalysis. (ACOG) (Level C)

Health care providers should be able to initiate evaluation and treatment of UI basing their judgment on the results of history, physical examination, post-voiding residual and urinalysis. (ICI) (Grade

COPYRIGHT:
This Physician Performance Measure (Measure) and related data specifications have been developed by the PCPI(R) Foundation (PCPI[R]) and the National Committee for Quality Assurance (NCQA). This Measure is not a clinical guideline and does not establish a standard of medical care, and has not been tested for all potential applications. The Measure, while copyrighted, can be reproduced and distributed, without modification, for noncommercial purposes, eg, use by health care providers in connection with their practices. Commercial use is defined as the sale, license, or distribution of the Measure for commercial gain, or incorporation of the Measure into a product or service that is sold, licensed or distributed for commercial gain. Commercial uses of the Measure require a license agreement between the user and the PCPI(R) or NCQA. Neither the American Medical Association (AMA), nor the former AMA-convened Physician Consortium for Performance Improvement(R), PCPI, NCQA nor its members shall be responsible for any use of the Measure. (C) 2017 National Committee for Quality Assurance and PCPI (R) Foundation. All Rights Reserved.

Limited proprietary coding is contained in the Measure specifications for user convenience. Users of proprietary code sets should obtain all necessary licenses from the owners of the code sets. NCQA disclaims all liability for use or accuracy of any CPT or other codes contained in the specifications.

The performance Measure is not a clinical guideline and does not establish a standard of medical care, and has not been tested for all potential applications. THE MEASURE AND SPECIFICATIONS ARE PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND.
2018 Registry Flow for Quality ID #48:
Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 Years and Older

SAMPLE CALCULATIONS:

Data Completeness =
Performance Met (n=49 patients) + Performance Not Met (n=30 patients) -
Eligible Population / Denominator (n=86 patients) =
79 patients / 86 patients = 91.07%

Performance Rate =
Performance Met (n=49 patients) -
Data Completeness Numerator (70 patients) =
57.14%

*See the posted Measure Specification for specific coding and instructions to submit this measure.
NOTE: Submission Frequency: Process per patient
2018 Registry Flow for Quality ID

#48: Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 years or older

Please refer to the specific section of the specification to identify the denominator and numerator information for use in submitting this Individual Specification. This flow is for registry data submission.

1. Start with Denominator

2. Check Female Patient Age:
   a. If the Female Age is greater than or equal to 65 years of age on Date of Service and equals No during the Measurement Period, do not include in Eligible Patient Population. Stop Processing.
   b. If the Female Age is greater than or equal to 65 years of age on Date of Service and equals Yes during the Measurement Period, proceed to check Encounter Performed.

3. Check Encounter Performed:
   a. If Encounter as Listed in the Denominator equals No, do not include in Eligible Patient Population. Stop Processing.
   b. If Encounter as Listed in the Denominator equals Yes, proceed to check Patient Use of Hospice Services Any Time During the Measurement Period.

4. Check Patient Use of Hospice Services Any Time During the Measurement Period:
   a. If Patient Use of Hospice Services Any Time During the Measurement Period equals No, include in the Eligible Population.
   b. If Patient Use of Hospice Services Any Time During the Measurement Period equals Yes, do not include in Eligible Patient Population. Stop Processing.

5. Denominator Population:
   a. Denominator Population is all Eligible Patients in the Denominator. Denominator is represented as Denominator in the Sample Calculation listed at the end of this document. Letter d equals 80 patients in the Sample Calculation.

6. Start Numerator

7. Check Presence or Absence of Urinary Incontinence Assessed:
   a. If Presence or Absence of Urinary Incontinence Assessed equals Yes, include in Data Completeness Met and Performance Met.
   b. Data Completeness Met and Performance Met letter is represented as Data Completeness and Performance Rate in the Sample Calculation listed at the end of this document. Letter a equals 40 patients in the Sample Calculation.
   c. If Presence or Absence of Urinary Incontinence Assessed equals No, proceed to Presence or Absence of Urinary Incontinence Not Assessed, Reason Not Specified.

8. Check Presence or Absence of Urinary Incontinence Not Assessed, Reason Not specified:
a. If Presence or Absence of Urinary Incontinence Not Assessed, Reason Not Specified equals Yes, include in Data Completeness Met and Performance Not Met.

b. Data Completeness Met and Performance Not Met letter is represented as Data Completeness in the Sample Calculation listed at the end of this document. Letter c equals 30 patients in the Sample Calculation.

c. If Presence or Absence of Urinary Incontinence Not Assessed, Reason Not Specified equals No, proceed to Data Completeness Not Met.

9. Check Data Completeness Not Met:

a. If Data Completeness Not Met equals No, Quality Data Code or equivalent not submitted. 10 patients have been subtracted from the Data Completeness Numerator in the Sample Calculation.

**SAMPLE CALCULATIONS:**

<table>
<thead>
<tr>
<th>Data Completeness</th>
<th>Performance Met (a=40 patients) + Performance Not Met (c=30 patients)</th>
<th>Eligible Population / Denominator (d=80 patients)</th>
<th>=</th>
<th>70 patients</th>
<th>87.50%</th>
</tr>
</thead>
<tbody>
<tr>
