Measure #20: Perioperative Care: Timing of Antibiotic Prophylaxis-
Ordering Physician

Is this patient 18 years or older scheduled for a surgical procedure from the list on the following page?

No

- No PQRS code reported

Yes

Was an antibiotic from the list on the following page ordered preoperatively?

No

- Report G8632 if an antibiotic not on the list was ordered

Yes

- Report G8631 for Order for Prophylactic Parenteral antibiotic not Given for Documented Reasons

Is there documentation of order (written order, verbal order, or standing order/protocol)?

No

- Report G8629 if ordered one hour prior to surgical incision*(or start of procedure when no incision required)

Yes

Was the antibiotic given within one hour prior to the surgical incision* (or start of procedure when no incision is required)

No

Yes

- Report G8630 if ordered and given within one hour prior to surgical incision* (or start of procedure when no incision required)

Note: Both G8629 and G8630 are correct ways to report Measure #20, but both cannot be reported simultaneously. G8629 indicates there is documentation of the order. You may stop there if you wish. However, if you wish to show the antibiotic has been given within the proper timeframe, report G8630.

*If fluoroquinolone or vancomycin, 2 hours prior to surgical incision
Measure #20: Perioperative Care: Timing of Antibiotic Prophylaxis-Ordering Physician

Table 1A: The antimicrobial drugs listed below are considered prophylactic antibiotics for the purpose of this measure.

<table>
<thead>
<tr>
<th>Ampicillin/sulbactam</th>
