Federal Spending Bill Proposes Increases in Urology Research Funding

The House and Senate have proposed a new funding resolution for the 2019 Department of Defense (DoD) and Health and Human Services (HHS) budget, which include **increases in medical research funding impacting urology**. These increases include \$2 billion to the NIH (\$39.1 billion total), \$5 million to the DoD Kidney Cancer Research Program (\$20 million total), and other increases for DoD programs that fund bladder cancer and interstitial cystitis research.

CALERIE Data Now Available for Analysis

The **Comprehensive Assessment of the Long-term Effects of Reducing Intake of Energy (CALERIE)** study was the first study to specifically focus on the effects of sustained caloric restriction (CR) in humans. The NIA-supported database contains information from study participants on physiological and immune functions, physical performance, psychological outcomes, dietary records, disease risk factors, blood chemistry, and hematology. The biospecimen repository includes serum, plasma, urine, muscle, and fat.
