Funding Opportunities

Summer Research Training in Aging for Medical Students (T35)
The primary goal of this Institutional Research Training Grant is to provide short-term training for medical students and other health professional students to obtain necessary aging research experiences and technical expertise and skills early during their education to encourage them to pursue careers in research. The award does not allow appointed Trainees to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor. **Application deadline: July 22, 2019.**

Primary Hyperoxaluria Type 3 Research Grant
The **Oxalosis & Hyperoxaluria Foundation** is now accepting applications to study PH Type 3 Hyperoxaluria. Possible areas of study include, but are not limited to, the mechanism(s) of hyperoxaluria, novel treatment strategies and targets, novel biomarkers, and new information regarding risk factors for stone formation or...
chronic kidney disease in PH type 3. Funding is available for up to $200,000 for up to two years. Application deadline: August 1, 2019.

Lasker Clinical Research Scholars Program (Si2/R00 Clinical Trial Optional)

The program offers the opportunity for a unique bridge between the NIH intramural and extramural research communities and contains two phases. In the first phase, Lasker scholars will receive appointments for up to 5-7 years as tenure-track investigators within the NIH Intramural Research Program with independent research budgets. In the second phase, successful scholars will receive up to 3 years of NIH support for their research at an extramural research facility; or, the scholar can be considered to remain as an investigator within the intramural program. Application deadline: August 30, 2019.
