

Basic Management of LUTS in Men

BOTHERSOME LUTS RECOMMENDED TESTS:

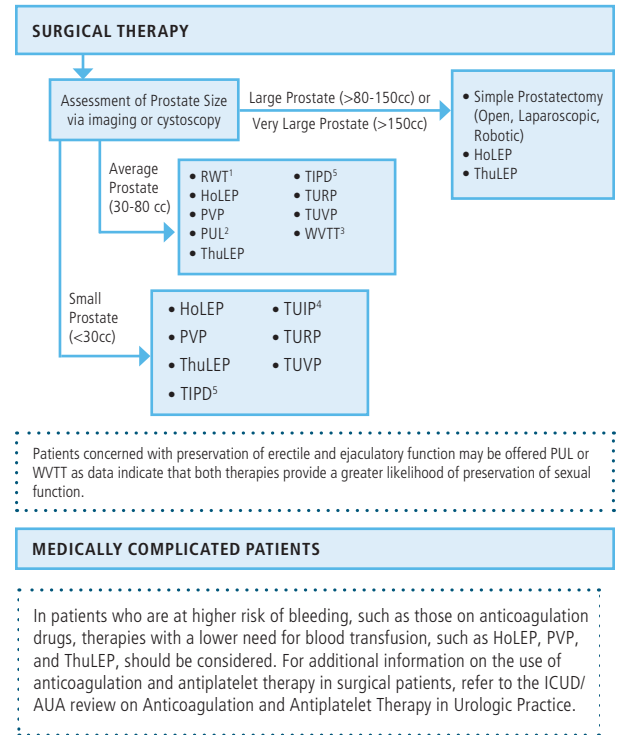

- Obtain medical history
- Perform physical examination
- Administer International Prostate Symptom Score (IPSS)
- Perform a urinalysis
- **If equipment available**, consider PVR and/or uroflowmetry.
- ***If PVR >300 cc, irrespective of symptoms, see white paper on "Non-Neurogenic Chronic Urinary Retention: Consensus Definition, Management Strategies, and Future Opportunities"**

Trial of Medical Therapy Algorithm

Surgical Management of Lower Urinary Tract Symptoms Attributed to Benign Prostatic Hyperplasia

Based on the evidence reports of the current guidelines, the following criteria are recommended when utilizing these approaches:

¹ RWT: prostate volume 30-80cc.

² PUL: absence of obstructing midline prostate tissue and prostate volume 30-80cc.

³ WVTT: prostate volume 30-80cc.

⁴ TUIP: prostate volume ≤30cc.

⁵ TIPD: prostate volume 25-75cc and absence of obstructive middle lobe
