University of Utah – Pediatric Urology Research Fellowship

The Pediatric Urology Research Fellowship at the University of Utah is a new one-year mentored research position offered annually to one qualified medical student interested in pursuing a urology residency. Students may complete the fellowship in between the MS3-MS4 years or after MS4 if not immediately entering residency. Fellows will build strong relationships while working directly with excellent faculty mentors on diverse research projects and clinical involvements at one of the strongest urology programs in the nation. The application deadline is June 8, 2020 to start ASAP.

New NIA Strategic Plan Acknowledges Urologic Conditions as Potential Targets for Research in Older Adults

The NIH National Institute of Aging (NIA) recently released its Strategic Directions for Research, 2020-2025. The new plan acknowledges a desire to improve the interaction of older adults with the health system, citing the fact that women often avoid seeking care for urinary incontinence as a key example. Further, as part of the NIA’s desire to focus on the health of older women, the plan cites urinary tract dysfunction as a key aspect of targeting age-related disease and conditions in women.

Funding Opportunities

**Institutional Network Award for Promoting Kidney, Urologic, and Hematologic Research Training (U2C-Clinical Trial Not Allowed)**

The purpose of this funding opportunity is to invite new Institutional Network Awards (U2C/TL1) to cultivate a highly integrated cohort of trainees and early career investigators and to develop career development resources to accelerate kidney, urologic, and hematologic research. To maximize integration and promote a true trainee community, Institutions are invited to submit a single, unified U2C/TL1 application to engage, recruit, prepare, and sustain the next generation of kidney, urology, and hematologic researchers. Applications covering a single metropolitan area are strongly encouraged. **The application deadline is September 28, 2020.**

**Urological Epidemiology (UroEpi) Institutional Research Career Development Program (K12-Independent Clinical Trial Not Allowed)**

This announcement invites institutional career development program (K12) applications in the area of epidemiology of benign urological conditions. This institutional program will provide scholars with research and/or clinical doctoral degrees with the skills and resources necessary to initiate an independent research career in the epidemiology of benign urological conditions within the mission of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). **The application deadline is June 18, 2020.**
