For Optimal Care for Patients with Urologic Conditions MVP in the MPFS final rule for CY2027, see p.2427-2430 in the display copy here. See below for a summary table of relevant quality measures, CMS's final action and their comments.

Measure ID	Measure title	CMS proposed action	AUA feedback	CMS final action
AQUA8	Hospital Admissions or Infectious Complications within 30 Days of Prostate Biopsy	Remove from the MVP (high performing)	Opposed removal	**Finalized as proposed (**AQUA8 has had minimal variation in its historical benchmark)
AQUA15	Stones: Urinalysis or Urine Culture Performed Before Surgical Stone Procedures	Remove from the MVP (process measure); modify if retained	Opposed removal	**Finalized/removed as proposed** (AQUA15 only assesses for documentation of a urinalysis or urine culture and does not require a quality action or plan of care to account for abnormal results; therefore, missing a workflow step necessary to driving positive health outcomes)
AQUA16	Non-Muscle Invasive Bladder Cancer: Repeat Transurethral Resection of Bladder Tumor (TURBT) for T1 Disease	Remove from the MVP (low adoption, no benchmark after 2 consecutive years in MIPS)	Opposed removal	**Finalized/removed as proposed** (AQUA16 has not met the case minimum and reporting volumes required for benchmarking after being in the program for 2 consecutive years.)
MUSIC4	Prostate Cancer: Active Surveillance/Watchful Waiting for Newly Diagnosed Low Risk Prostate Cancer Patients	Modify	Opposed proposed revision	**Not revised** (will not be finalized as the measure steward determined no updates to the measure were necessary for CY 2027)
AQUA14	Stones: Repeat Shock Wave Lithotripsy Within 6 Months of Initial Treatment	Remove from the MVP (high performing), modify if retained	Supported removal	**Finalized/removed as proposed** (high performing)

Q050	Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older	Add to the MVP as a core measure	Opposed designation of core measures	**Finalized as proposed (**CMS acknowledged limitations in the selection of core measures due to the current inventory of MIPS quality measures and sought to balance measures aligned with MVP goals with those available for clinician reporting. CMS will review core measures annually and revise them as appropriate.)
Q358	Patient-Centered Surgical Risk Assessment and Communication	Add to the MVP as a core measure	Opposed designation of core measures	**Finalized as proposed** (same reason cited above for Q050)
Q462	Bone Density Evaluation for Patients with Prostate Cancer and Receiving Androgen Deprivation Therapy	Add to the MVP as a core measure	Opposed designation of core measures	**Finalized as proposed** (same reason cited above for Q050)
IA_BE_16	Promote Self-management in Usual Care	Add to Improvement Activities	Supported	**Finalized as proposed**
IA_CC_9	Implementation of practices/processes for developing regular individual care plans	Add to Improvement Activities	Supported	**Finalized as proposed**
IA_BE_15	Engagement of Patients, Family, and Caregivers in Developing a Plan of Care	Remove from Improvement Activities	Supported	**Finalized as proposed**
